

Yamaguchi corpus (CHILDES / Phonbank)

- **Responsable scientifique** : Naomi Yamaguchi
- **Interaction parent-enfant** : Spontané
- **Type de corpus** : Audio Vidéo
- **Langues du corpus** : Français
- **Description** :

The recordings were part of the Leonard and COLAJE projects coordinated by Prof. Aliyah Morgenstern. The participant in these projects was recorded in his home in a naturalistic setting, for one hour every month. Adrien was recorded from in 26 sessions from age 1;11.14 to 4;3.27 by the author, who is also a friend of the child's family.

During the recordings the child typically looked at picture books and played with toys with one of his parents, and sometimes bathing times were recorded; there were no instructions given as to word elicitation to the parents.

The video recordings were made using a Sony HDV 1080i/mini DV camera, and the audio recordings were made using a wireless microphone (Sennheiser, EW 112-p G2) worn by the child. The tapes were digitized using iMovie.

This corpus was originally segmented and transcribed with Phon. The phonetic transcription (IPA Actual) was double-checked as for 4.5% of the total data, and the agreement percentage for consonants reached 95.5%.

- **Année(s) de collecte** : 2006-2009
- **Nombre de locuteurs** : 1
- **Informations sur les locuteurs** :

One child, mother, father, investigator, sometimes other relatives and friends

- **Durée (en H)** :
- **Accès** : Restreint
- **Statut** : Annoté
- **Annotations** : Phonèmes Transcription
