

French-Greek children corpus - Spontaneous

- **Responsable scientifique** : Clémence Guieu-Grandsire
- **Interaction parent-enfant** Spontané
- **Type de corpus** : Audio
- **Langues du corpus** : Français Grec
- **Description** :

Bilingual children were recorded with the LENA system, a little recorder placed in a child-adapted cotton jacket. Parents were asked to record as much as possible of their daily routine (recordings go from 3hours to 12hours depending on families), especially on shared moments with their children (lunch/dinners, bath-time, sleeping routine, play times...). Every child has been recorded 3 times, once every six months. Only 40hours have been annotated. Those hours correspond to identified interactive moments (Child-directed Speech – CDS), between the child and a relative.

- **Année(s) de collecte** : 2021-2022
- **Nombre de locuteurs** : 11
- **Informations sur les locuteurs** :

11 French-Greek bilingual children: 6 living in France and 5 in Greece. All children are aged between 2;9 and 6;2.

- **Durée (en H)** : 323
- **Accès** : Restreint
- **Statut** : Annoté
- **Annotations** : Langue Locuteur
