

Laboratoire de Phonétique et Phonologie

Naomi Yamaguchi
MCF

Phonology, phonological acquisition, phonological loss, interfaces between phonology and other linguistic levels

Jingyi Sun
PhD candidate

Speech production, foreign language acquisition, accommodation, rhythm

H el ene Massis
PhD candidate

Clinical phonetics, voice quality, speech and voice pathology, experimental phonetics, speech therapy

Cl emence Guieu-Grandsire
PhD candidate

Bilingualism, phonological acquisition, perception and production

Carole Millot
PhD candidate

Voice quality, speech processing, speech perception, speaker recognition

Barbara K uhnert
MCF

Speech production, foreign language acquisition, accommodation, rhythm

Ang elique Amelot
IR

Experimental phonetics

Am elie Elmerich
PhD candidate

Nasality, clinical phonetics, experimental phonetics, AeroMask

Alexis Dehais-Underdown
Postdoc

Phonetics, beatboxing, physiology

Philipp Buech
PhD candidate

Secondary articulations, acoustics, articulation, signal processing, quantitative typology

Minmin Yang
PhD candidate

Language acquisition, speech production, articulatory phonology

Lila Kim
PhD candidate

Speech, neural language models, nasality, physiology

Rachid Ridouane
DR

Laboratory phonology, Amazigh language, syllables, features, clusters

Anne Hermes
CR

Speech motor control, aging, Articulatory Phonology, coordination & linguistics structures

Wenxun Fu
PhD candidate

L2 pronunciation training, speaking styles, speech reduction

Claire Pillot-Loiseau
Full professor

Voice & speech, atypical voice & speech (disorders, singing voice & speech, voice & speech in L2), accommodation

Maddie Gilbert
Postdoc

Phonetics-phonology interface, acoustics, variation, segmental complexity, speech perception

Roland Trouville
IR

Data management

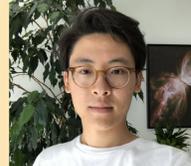

Andr es Felipe Lara
PhD candidate

Language acquisition/learning, articulatory phonetics/phonology, bilingualism

Ekaterina Biteeva
Postdoc

Speech motor control, experimental & general phonetics & phonology, articulatory methods

Bowei Shao
Postdoc

Speech articulation, gradience & categoricity in phonetics & phonology

Gw ena elle Lo Bue
Gestionnaire administrative

Annie Riolland
DR  m erite

Multilinear models, tones & intonation, history of phonetics

Jacqueline Vaissiere
Professeur  m erite

Acoustic phonetics, clinical phonetics, nasality, language teaching

Pierre Hall e
DR  m erite

Psycholinguistics, speech perception & acquisition,

Shigeko Shinohara
CRHC

Phonological theory, phonetics-phonology interface, segment-prosody interface, role of perception in L1 & L2 grammars

Louise Wohmann-Bruzzo
PhD candidate

Ageing & speech, coarticulation, speech motor control

Lei Xi
PhD candidate

Prosody, EEG & ERP, acquisition of L2, neurolinguistics, psycholinguistics, phonetics

Lise Crevier-Buchmann
CRHC (retired CNRS) Active in clinics & clinical research

Clinical phonetics, normal & atypical voice and speech

Nicolas Audibert
MCF

Expressive speech, clinical phonetics, within & between-speaker variability, age-related effects on speech

Clara Ponchard
Postdoc

Parkinson's disease, dysarthria, women, aerodynamics, acoustics, aging, stop consonants, NLP

Martine Adda-Decker
DR

Corpus linguistics, pronunciation variation, automatic speech processing, pronunciation dictionaries, spontaneous speech

Dayeon Yoon
PhD candidate

Production & perception of sex & gender in speech, crosslinguistic variation, coarticulation

Didier Demolin
Professeur  m erite

Phonetics: experimental, physiological, acoustic, comparative

Jiayin Gao
CR

Individual differences in speech perception, sound change, segmental-suprasegmental interactions

Jinyu Li
Postdoc

Speech rhythm, speech motor control, coordination, convergence, psycholinguistics

C ecile Fougeron
DR

Laboratory Phonology, clinical phonetics, individual variation

Yezhou Jiang
PhD candidate

Speech perception, phonetic variation & change, prosody & intonation

Michaele Pernon
Associate member

Motor speech disorders, dual task, speech assessment

Boram Lee
PhD candidate

Second language acquisition, speech production, speech perception

Juliusz Cecelewski
PhD candidate

Acoustic phonetics, sociophonetics, sound change, diachronic phonetics, historical laboratory phonology

Alice Yildiz
PhD candidate

Prosody, coordination, variability, pathology

Xuejing Chen
PhD candidate

Sonority Sequencing Principle, perception & production of clusters

C edric Gendrot
Full professor

Phonetics & NLP, speaker characteristics, prosody & articulation

Ingrid Citerne
Gestionnaire administrative

Ang elina Bourbon
PhD candidate

Motor Speech Disorders, speech motor control, aging

St ephane Hans
PUPH, chef du service ORL h opital FOCH

Laryngology, clinical phonetics, min.invasive laser & robotic surgery

Shinjii Maeda
DR  m erite

Instrumentation, articulatory synthesis
